AZ CORP COMMISSION DOCKET CONTROL

Carmel Hood Arizona Corporation Commission Compliance Division

1200 W. Washington St. Phoenix, AZ 85007-2996

Subject: Compliance Filing for Payson Water Company Decision 74567 (Docket Nos. W-03514A-13-0111/ W-03514A-13-0142)

Ms. Hood,

Attached, please find a compliance filing regarding water loss as required in the afore-referenced decision. This attached water loss report summarizes water production and consumption from June of 2014 to September 2015. Per the order, this will be the final quarterly update provided.

Please note following regarding water losses:

- TCS losses have improved dramatically from this time last year, however we are still seeing consistent losses over 20%. Following use of a listening device over the summer, it is more than likely that the primary source of the problem is a series of old water lines which served areas destroyed by flooding about a decade ago. It is possible that one or more of these lines was not properly capped, or has subsequently split/ broken and may be leaking without any customers or Company staff noticing (since much of this area is no longer served by roads, and is overgrown.
- Overall, company water losses have improved from well over 25% to an average of 15% during the last few months. Switching of well meters from standard to composite meters will also provide much more accurate well reads, which may have been the source of some of the previous months' water losses.

Anzona Comporation Commission
